

SHREEJI MAGNUM CAST

Premium Grade, Excellent for Down-Gauged or Higher Stretch Applications

MAGNUM CAST is the ideal film if you are looking to down-gauge an application or desire very high pre-stretch. This film is a high-performance, cast co-extruded film made from high technology resins. Optimum performance is obtained when pre-stretched to levels of 250% to 300%. When applied at high pre-stretch, Magnum is a differential cling film. The enhanced strength and stretch characteristics mean mini mum film usage while providing maximum load-holding on less demanding loads.

Down-gauging not recommended for heavy B or unstable C loads.

MAGNUM CAST—down-gauge or increase pre-stretch and save, a simple cost-saving solution!

SHREEJI CLASSIC BLOWN
Applications Include:
Boxed Products
Bagged Products
Distribution Warehouses
Food Processors
Automatic Equipment
Most A&B Loads
